## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim does not end with a ".". Hence it is not clear if part of the claim has been omitted.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Sus et al. The patent to Sus shows a fishing rod holder with a bite detector having a housing 5 having a shaft or inner housing 6 rotatably mounted therein. One end of the shaft is connected to mounting means 8 for a fishing rod as shown in Fig. 2. Sus shows spring means 13 such that rotation of the shaft tightens the spring. Sus shows latching means or plug 11 with plunger end 11'.

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 2-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sus et al.

The patent to Sus shows a fishhook setting device as discussed above. Sus shows movement of about 90 degrees from a first position to a second position in column 4, line 8, but it would have been obvious to employ a movement of about 45 degrees since routine experimentation would be used to determine the optimum operating characteristics of the device. In reference to claim 3, Sus shows the latching means with release the spring loaded shaft upon slight movement and tension supplied to the shaft as disclosed in column 3, line 34 to column 4, line 6. In reference to claim 4, Sus shows means 1 to mount the housing to a fixed surface such as a railing. In reference to claim 5, Sus shows the coiled spring having a straight tab on the end attached to the inner housing in Fig. 3 and a curved tab on the other end, but it would have been obvious to employ a straight tab on each end since the function is the same and no stated problem is solved. In reference to claim 6, Sus shows stop means such as the end of the slot 9" engaging stop-pin 14.

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ford, Emory, and Reichardt show other fish catching devices.
